

This bipedal robot is taking the world by storm. An incredible advanced robot with 17 motors, i-Sobot can make complicated moves such as dancing to Swan Lake and grabbing teaspoons in his hand.

i-Sobot holds the 2008 Guinness World Record for being the "smallest mass produced bipedal humanoid robot". At only 16 cm tall and weighing a mere 300 grams, he is crammed full of the latest robot technology. Four unique modes allow for performing a selection of fun and quirky scenes from Western battles, responding to ten varied voice commands and more. He may be small in size but he's big on personality!

i-Sobot comes ready for action straight out of the box, so be prepared for some jaw-dropping robot antics as soon as you switch him on!

• 17 mini-motors give him incredible human-like movement.

• LED lights up when he performs your commands.

• Infrared sensor receives remote commands.

• Two fingers and a thumb for a sophisticated grip.

• Hear i-Sobot speak over 200 phrases from his built-in speaker.

• Control his actions with either a remote control or use your own voice!

• Pre-installed actions which allow him to really show off his kung fu and gymnastic moves plus much, much more!

Available from: leading toy retailers and online
Recommended retail price: £199.99
